## DETAILED ACTION

### *Response to Amendment*

Claims 15, 18-28 are in the case.

Claims 1-14, 16-17 have been canceled.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 15, 18-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Berger et al (7,063,075).

Berger et al teaches at least a first portion (4) for bracing against the fuel injector 9; and at least a second portion for bracing against the fuel-distributor line 10; wherein the support element is adapted to space (7) the fuel injector 9 and the fuel-distributor line 10 apart from one another in a manner that is free of radial forces; wherein the support element includes a clamp (2, 8) which is braced against a shoulder 17 of the fuel injector on one side and against a shoulder 16 of the fuel-distributor line on another side; and wherein the support element includes tabs 5 that are elastically deformable in an axial direction of the fuel injector and the fuel distributor line (see Figure 2).

***Response to Arguments***

3. Applicant's arguments with respect to claims 15, 18-28 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
